METADOR

Fully Glazed

Fire Rated

DDA Compliant

The Defender Clearguard system is stronger, more secure and lasts longer than aluminium systems. Constructed using rolled steel profiles with fully welded corners for maximum strength.

Large range of profiles gives endless possibilities for combinations of single & double doorsets, inward & outward opening, sidescreens, overpanels and even complete facades.

Hardware

Wide range of mechanical and electronic locking options.

Fire Rated Option

Available fire rated up to 90 minutes, with both 'integrity-only' or 'integrity and insulating' options.

Thermal Performance

Thermally broken profiles with reduced U values are also available for external use.

Vision Panels

- 60mm wide steel profile
- Ideal for prestigious and high-use locations
- When specified with anti-bandit glazing, Clearguard is ideal for high security situations.

Over Panels/Side panels

Sidescreens, overpanels and even complete facades all available with the Clearguard system.

Finishes

- Powder coated as standard in any RAL colour
- Marine-grade upgrade option available for harsh environments
- Also available in stainless steel.
